

EU funds - and especially the new [Horizon 2020](#) for research and innovation - can open up an entire world of opportunities to SMEs, large companies, universities, and associations, but require a thorough understanding, a challenging management, and a constant updating, which only experts can provide.

Operating since 1971, ISIS - Institute of Studies for the Integration of Systems, www.isis-it.com – is a leader company in the research, consulting and EU-funded projects sector.

ISIS is able to consolidate highly effective and successful proposals, coordinating groups of international partners and meeting complex finance and administrative rules during the whole project's cycle. For this reason, in 2012

ISIS ranked second in Italy, and twelfth in Europe, among SMEs securing the highest amount of funding for research projects, under the Seventh EU Framework Programme (FP7).

ISIS has participated in over 90 European research projects (FP5, FP6 FP7, IEE), leading over 30 projects with an average budget of 3 million euros - including [FLAGSHIP](#), [URBACHINA](#), [PASHMINA](#), [CIVITAS MIMOSA](#), [CIVITAS CATALIST](#), [STADIUM](#), [BIOMASTER](#), [POLY-SUMP](#), [ATLETE II](#), [MURE-ODYSSEE](#), [THRESHOLD](#), [CONDUITS](#), [SPICYCLE](#).

ISIS offers a 360-degree assistance to those actors wishing to explore and access public funding at European and national level.

Our support covers one or more project's phases, starting with tailor-made trainings, and continuing with the identification and screening of relevant opportunities, the formulation of a project's strategy, the management, negotiation and implementation of the project, as well as the development of a promotional strategy.

Our Offer

0. Training

- Customized trainings on European project management, providing necessary tools to understand EU funding, and to enable you drafting, managing and consolidating a proposal

1. Screening of opportunities

- Definition of the company profile: analysis of relevant information and data, in order to identify main opportunities within EU funding
- Detailed mapping of existing opportunities in relevant thematic areas, including a short/medium and long term analysis
- Assistance in the development of a strategic approach maximizing the possibilities of success

2. Proposal definition and presentation

- Support in the definition of the project idea, assessing strengths and weaknesses, and in the consortium building (when required)
- Assistance in the preparation of the proposal (from a scientific-technical, administrative and financial perspective)

3. Project management

- Assistance during the negotiation phase with competent authorities
- Support and follow-up in the administrative/financial and technical field (day-to-day management)
 - Development of dedicated project management tools

4. Promotion of the project and dissemination of results

- Development of a promotional strategy to maximize the project visibility (including workshops, publications, media relations, and social channels)
